
Electromagnetic Spectrum Worksheet 1 Answer Key

waves & electromagnetic spectrum worksheet - electromagnetic spectrum worksheet #1 1. in each of the following pairs, circle the form of radiation with the longer wavelength: a. red light or blue light b. microwaves or radiowaves c. infrared radiation or red light d. gamma rays or uv radiation 2. in each of the following pairs, circle the form of radiation with the greater frequency: **unit 2 the electromagnetic spectrum - nasa** - each region of the electromagnetic spectrum provides a piece of the puzzle. using more than one region of the electromagnetic spectrum at a time gives scientists a more complete picture. for example, relatively cool objects, such as star-forming clouds of gas and dust, show up best in the radio and infrared spectral region. hotter objects, **exploring the electromagnetic spectrum math worksheet** - exploring the electromagnetic spectrum lesson - math worksheet 1 exploring the electromagnetic spectrum math worksheet 1) write the names of the electromagnetic waves by their wavelengths (smallest to largest). they are shown below, but they are not in any order. x-ray infrared (heat) visible light microwave **the electromagnetic spectrum - echalk** - 22. electromagnetic waves can travel through a vacuum. true false 23. sound waves are part of the electromagnetic spectrum. true false 24. light waves, water waves, microwaves and the 'mexican wave' are all examples of ____ waves. electromagnetic transverse longitudinal (answers) the electromagnetic spectrum **critical thinking activity: the electromagnetic spectrum** - critical thinking activity: the electromagnetic spectrum there are many kinds of energy in the universe. the energy given off from the sun is radiant energy, scientifically called electromagnetic radiation. produced by nuclear reactions at the core of the sun, this energy streams from the surface of the sun in waves of different lengths. **waves and electromagnetic spectrum review worksheet** - electromagnetic waves bend as they pass through different mediums. ____ 24. electromagnetic waves travel the slowest in gases. ____ 25. concave lenses concentrate light waves at a focal point. ... microsoft word - waves and electromagnetic spectrum review worksheet author: **electromagnetic waves student worksheet answer the ...** - this worksheet is intended to accompany the electromagnetic spectrum powerpoint (electromagnetic spectrum.pptx) created as part of haystack observatory's ret project on physics and mosaic. the powerpoint can be used as an in-class presentation, but also could be re-envisioned as a webquest-type activity of self-directed learning. **the electromagnetic spectrum - tumwater.k12.wa** - electromagnetic radiation from the given word bank. 9. look carefully at the electromagnetic spectrum shown below paying attention to the wavelengths and frequencies indicated. the visible portion of the electromagnetic spectrum has been enlarged below the spectrum. fill in the blanks with the correct colors from the visible spectrum according to **nasa's video tour of the electromagnetic spectrum** - nasa's video tour of the electromagnetic spectrum ... open a window with a short video clip that introduces you to the electromagnetic spectrum. complete this guide as you watch the video. you can pause the video to answer questions as you go. continue on to radio waves, microwaves, ... which waves on the em spectrum have the lowest frequency ... **the electromagnetic spectrum - lee.k12** - this is called the electromagnetic spectrum. 5 the longer the wavelength, the less energy the em carries. visible light is just a very small portion of electromagnetic energy. visible light comes in these colors: violet, indigo, blue, green, yellow, orange, and red. red has the longest wavelength of visible light, so it has the lowest energy. **the electromagnetic spectrum - t e harrington middle school** - the order they fit into the electromagnetic spectrum all of these are "electromagnetic waves". this means that although they appear to be very different, in fact they're all made of the same kind of vibrations - but at different . all electromagnetic waves travel at the same speed - 300,000,000 metres per second, which is the speed of light.
